

## Satellite VPN

DSD offers a full range of VPN (Virtual Private Networks) over satellite and between satellite links and terrestrial DSL links.

Our solutions are :

- meshed corporate private network
- dedicated bandwidth based private network over satellite (double hop shared bandwidth star topology)
- low cost private network over satellite (double hop shared bandwidth star topology)
- mixed satellite Internet / terrestrial internet VPN network

Whatever you needs are and whatever you budget is, DSD can offer you a solution matching your needs.
