

Ku band satellite internet Africa Telstar 11N

DSD has new ku-band satellite internet access services via it's new Telstar 11N iDirect evolution X3 and Infinity 3100 HUB.

The new Evolution X3 is the first next-generation satellite router featuring iDirect's highly efficient implementation of the DVB-S2 standard.

Evolution X3 is ideally suited for broadband requirements such as Internet and VPN access to enterprise networks, as well as real-time VoIP and videoconferencing. To know more about this modem please visit : iDirect website

New DSD IP Fusion iDirect evolution X3 is the next generation Broadband internet access for Africa.

Using high power Ku-band, DSD stays on the top of the range in satellite internet access quality with less problems happening when heavy rain falls happen.

The strong points of satellite internet broadband IP Fusion services are :

- high reliability services thanks to the use of DVB-S2 ACM reducing service outage during heavy rains
- large contention ratio choice from 20:1 to 2:1
- lower cost modem compared to former idirect infinity 3100 series
- 1.2m antenna 4W BUC is enough on the most part of the coverage
